Prerequisite Skills:

None

Measurable Objectives:

Upon completion of this course, the student should be able to:

1. demonstrate understanding of his/her learning strengths and weaknesses through testing that determines eligibility for learning disability services;
2. apply compensatory strategies based on these learning styles;
3. demonstrate newly acquired study skills techniques;
4. participate in educational testing that determines eligibility for services as a students with learning disability;
5. participate in class wide discussions, readings, and activities to explore options and strategies for effective study techniques (i.e. study groups; memorization techniques; etc);
6. demonstrate knowledge of definition of learning differences and how strengths and weaknesses can impact success in the college environment.

Course Content:

Course Content (Lecture)

1. Information on the various learning styles and deficits that impact students in academic classes
2. Films and reading material educating students about study skills techniques that can be used in other classes as it pertains to students with learning disabilities
3. Demonstrations of various learning strategies, accommodations and techniques the student may apply based on his/her test results
4. Use of learning profiles to explore academic and career paths
5. Evaluation of Academic Profile assessments: for example: LSI (Learning Style Inventory), ADSA (Attention Deficit Survey Analysis), MBTI (Myers Briggs Type Indicator)

Methods of Presentation

1. Lecture/Discussion
2. Films
3. Standardized tests and informal assessments
4. Class discussion
5. Individual conference with student to review assessment results

Assignments and Methods of Evaluating Student Progress

1. Typical Assignments
   A. Complete the Learning Skills Inventory. Be sure to answer all questions so that your student profile will be complete.
   B. Write a 200 word essay about your high school experience. Include what classes you like or dislike and why.
