Demonstration of Critical Thinking:

There may be many strategies for encouraging students to develop critical thinking skills but one traditional method of teaching philosophy is to bring students to recognize they can learn directly from the text the meaning of the text by disciplining themselves to explicate the text and present their analysis before their peers. This is, of course, the explicatio de text method of teaching, the method of approach achieving its goal of critical thinking by continuously applying students to the task of analysis, writing papers demonstrating their skills, and answering questions the presuppose such learning.
