This course is designed to introduce students to corrections-based systems. It covers all aspects of corrections and how they relate to the entire criminal justice system. Students will study probation, parole, jail and prison programs currently in use in the United States. Incarceration trends will be analyzed, and how political environments effect the prosecution and sentencing process. Students will explore different institutional programs, including the use and effectiveness of community based corrections programs. Students will gain an understanding of the issues related to managing inmates in institutions and the constitutional issues that surround the corrections system.

METHODS OF INSTRUCTION:

A. Lecture:
B. Independent Study:

INSTRUCTIONAL TECHNIQUES:

COURSE ASSIGNMENTS:

Reading Assignments

Textbook
Selected instructor handouts
Article Reviews
Research materials

Out-of-class Assignments

Writing Assignments

Students will be required to write a research paper on a subject that is directly related to this course.
Students will be required to participate in group learning activities, active discussions and problem solving scenerios.
Tests
METHODS OF STUDENT EVALUATION:
Midterm Exam
Final Exam
Written Assignments
Objective Examinations
Report
Projects (ind/group)
Problem Solving Exercises
Oral Presentations
Skills Demonstration

Demonstration of Critical Thinking:
1. Students will study the system of corrections and will be required to make plausible recommendations for change and reform to the system. They will be required to defend their point of view using course material or other notable publications.
2. Students will participate in active class discussions of the lecture and reading material. They will be required to evaluate information and present their ideas in an informed and educated manner.
3. Students will research and evaluate the information that is provided in this course and develop a research paper that is based on information derived from the course.

Required Writing, Problem Solving, Skills Demonstration:
Students will be required to write a research paper on a subject that is directly related to this course. Students will be required to participate in group learning activities, active discussions and problem solving scenarios.
