Page 1 of 4
1. Demonstrate the ability to write music notation by dictation: rhythmic, metric, chromatic alterations, and modulation to closely-related keys.

2. Demonstrate the ability to aurally identify and transcribe 4-part harmonic progressions utilizing secondary/applied chords and modulation to closely-related keys.

3. Define and recognize the basic written modulation procedures and specific harmonic functions of compositions utilizing chromatic harmony.

4. Utilize historically correct compositional forms to write chromatic music using correct style, choices made consistent with prescribed rules of chromatic harmony.

5. Create, identify, and analyze stylistically contextually correct musical examples with deductive logic.

COURSE OBJECTIVES:

I Demonstrate the ability to read music with understanding, recognizing patterns and musical function, by

I.1. Writing and identifying secondary/applied chords (dominant and fully diminished) seventh chords in root position and inversion.
I.2. Writing and identifying borrowed chords and other mixture chords (secondary and double) in root position and inversion.
I.3. Using secondary/applied 7th chords, borrowed/mixture chords, diatonic and modulation sequences: Realize a figured bass; harmonize a given melody.
I.5. Performing formal analysis of music that uses binary and ternary forms.
I.6. Developing greater understanding of chromatic harmony by composing music using musical elements included in the course content.

II Demonstrate the ability to hear music with understanding, recognizing patterns and musical function, by

II.1. Taking dictation of rhythms with triplets/duplets and syncopation in simple and compound meter signatures.
II.2. Taking dictation of melodies in major and minor keys with triplets/duplets, syncopation, chromatic alterations, and modulation to closely-related keys.
II.3. Aurally identifying and transcribing 4-part harmonic progressions utilizing secondary/applied chords and modulation to closely-related keys.
II.4. Sight-reading and performing rhythms with triplets/duplets and syncopation in simple and compound meters.
II.5. Preparing and sight-singing melodies with triplets/duplets, syncopation, chromatic alterations, and modulation to closely-related keys.

COURSE CONTENT:

LECTURE CONTENT:

J. Rhythmic Aural Skills

1. Exercises with rhythmic patterns featuring triplets/duplets and syncopation in simple and compound meters at various tempos.

2. Dictation of rhythms with triplets/duplets and syncopation in simple and compound meters at various tempos.

K. Intermediate Musicianship

1. Sight-singing and performance of music in multiple parts (canons, duets, chorales, etc.) appropriate to the topics studied.

2. Performance of rhythm and sight-singing exercises while conducting.

3. Exercises to detect errors in rhythm, pitch, harmony, and/or solfeggio.

COURSE ASSIGNMENTS:

Reading Assignments

Out-of-class Assignments

Plan an 18 bar original work in 4 part harmony employing one modulation (key change) and return via prescribed chromatic chords of modulation. All materials used (key center, rhythm, etc.) are chosen by student and must be chosen to fulfill required styles and demands of chromatic theory rules.

Writing Assignments

1. Weekly written assignments requiring writing a single musical line in 4 part harmony, analyzed with figured bass using rules of chromatic theory and new chords.

2. Weekly written assignments requiring analyzing great music literature, labeling and identifying new chords function - modulation applied to own work. Compare composers usage of new harmonies.

3. Evaluate and select means of modulation in analysis and written work.

4. Weekly proficiencies, quizzes; dictation, writing what is heard; intervals, melodies, multi-chord progressions, rhythmic examples; sight-singing weekly. The weekly assignments/tests will prepare students for junior level proficiency written/aural exams at a four-year university.
METHODS OF STUDENT EVALUATION:
Midterm Exam
Final Exam
Short Quizzes
Written Assignments
Objective Examinations
Projects (ind/group)
Problem Solving Exercises
Skills Demonstration

Demonstration of Critical Thinking:
1. Using techniques of form and analysis to examine examples of late-Romantic literature, analyze and identify occurrences of modulation.
2. Identify and label the function of every note in music literature examples.
3. Integrate theory rules and regulations for analysis, and reproduce romantic forms and styles with original ideas to demonstrate understanding.

Required Writing, Problem Solving, Skills Demonstration:
1. Weekly written assignments requiring writing a single musical line in 4 part harmony, analyzed with figured bass using rules of chromatic theory and new chords.
2. Evaluate and select means of modulation in analysis and written work.
3. Weekly proficiencies: quizzes, dictation, writing what is heard; intervals, melodies, multi-chord progressions, rhythmic examples; sight-singing. The weekly assignments/tests will prepare students for junior level proficiency written/aural exams at a four-year university.
