INSTRUCTIONAL TECHNIQUES:

Lecture, video, or online lessons to develop course content. In class, out of class, and online opportunities to develop critical thinking and problem solving skills as related to the course material.

COURSE ASSIGNMENTS:

Reading Assignments
Weekly reading of the course textbook. Supplemental reading of current articles and periodicals relating to course content.

Out-of-class Assignments
Assignments demonstrating application of course material including graphing, mathematical computation, and problem solving used to explain and provide solutions to economic applications.

Writing Assignments
Exams with written and short answer analysis involving problem solving using equations and ability to illustrate and interpret concepts graphically.
Written homework assignments, journals, or discussions requiring use of course content.

METHODS OF STUDENT EVALUATION:

Midterm Exam
Final Exam
Short Quizzes
Written Assignments
Essay Examinations
Objective Examinations
Projects (ind/group)
Problem Solving Exercises

Demonstration of Critical Thinking:

Course exams and quizzes providing a combination of multiple choice questions and short answer questions that demonstrate application and analysis of course content.

Required Writing, Problem Solving, Skills Demonstration:

Use of economic equations and tools such as graphing to explain and provide solutions to course concepts demonstrated through written assignments and exams.

TEXTS, READINGS, AND RESOURCES:

TextBooks:

LIBRARY:

Adequate library resources include: Print Materials
